PROFESSIONAL SUMMARY

I am a hybrid: a results-driven **Senior Full-Stack Software Engineer** and **AI/ML Architect** who approaches development with the strategic, hands-on mindset of a Project Manager. Over my 5+ years of scaling products in the global startup ecosystem, I have learned that great code only succeeds when the entire project lifecycle is managed with absolute precision. I take deep, personal ownership of my work—from architecting highly scalable AWS serverless backends to coding cross-platform mobile interfaces and leading agile engineering teams.

My technical core is anchored in **Node.js, TypeScript, JavaScript, and PHP (Laravel)** for high-concurrency server architectures, paired with **Next.js and React** for performance-driven web frontends. On the mobile front, I build fluid, native-quality experiences using **Flutter (Dart), React Native, Java, and Kotlin**. Beyond traditional full-stack development, I specialize in architecting **AWS serverless environments** and pioneering **agentic AI systems**—integrating LLMs (Google Gemini, OpenAI, DeepSeek) to build autonomous AI agents that optimize business operations and drive customer engagement. Whether I am mentoring distributed teams, slashing operational costs, or accelerating sprint velocity, my ultimate goal remains unchanged: delivering exceptional, scalable software that addresses critical systemic challenges and drives measurable business growth.

CORE COMPETENCIES & TECHNICAL ARSENAL

- **Backend & Server-Side:** Node.js, TypeScript, JavaScript (ES6+), PHP (Laravel), NestJS, Express, RESTful APIs, GraphQL, System Design.
- **Frontend & Web Full-Stack:** Next.js, React, HTML5/CSS3, Angular, TailwindCSS.
- **Mobile Engineering:** Flutter (Dart), React Native, Native Android (Java, Kotlin).
- **Cloud, DevOps & Infrastructure:** AWS (Lambda, API Gateway, DynamoDB, S3, RDS), Google Cloud Platform (GCP), Docker, CI/CD Pipelines, GitHub Actions, Firebase.
- **AI/ML & Agentic Engineering:** Autonomous AI Agents, LLM Orchestration (Gemini, OpenAI, DeepSeek), LangChain, Vector Databases (Pinecone), Firebase ML Kit.
- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis, Firestore.
- **Leadership & Methodologies:** Technical Product Ownership, Agile/Scrum Sprints, Resource Allocation, Jira, Budget Optimization, Cross-Functional Team Leadership.

PROFESSIONAL EXPERIENCE

MOREX WEB ENTERPRISES GROUP OF COMPANIES LTD

Founder, CEO & CTO | *Owerri, Nigeria (Remote)* | *Jan 2022 – Present I founded and lead this cutting-edge technology holding company, overseeing a portfolio of innovative digital ventures and SaaS platforms focused on AI education, scalable commerce, and custom system implementation.*

- **Portfolio Architecture:** I architected the group's overarching technical blueprint, utilizing **Node.js, TypeScript, and AWS serverless backends** to host high-performance, independent client applications.
- **AI Agent Engineering:** I designed and deployed multi-modal **autonomous AI agents** capable of executing complex text, code, and voice-synthesis workflows, exposing them through full-stack portals built on **Next.js and React**.
- **Educational Outreach:** I directed the development of comprehensive, expert-led AI training modules, tutorials, and educational content through MorexWeb Technologies, empowering professionals to master modern AI models and machine learning workflows.

FUSIONHUB / MOREX WEB TECH

Senior Software Engineer & Team Lead | *Remote* | *Jan 2022 – Present In this dual role as lead architect and project lead, I managed the end-to-end cloud-native development lifecycle for multiple integrated enterprise software platforms.*

- **AWS Infrastructure Transformation:** I spearheaded a complete engineering migration from a legacy monolithic architecture to a fully optimized **AWS Serverless environment** (Lambda, API Gateway, DynamoDB), successfully cutting operational infrastructure costs by **35%** while locking in **99.9% uptime** reliability.
- **SaaS Product Scaling:** I architected, built, and scaled 6+ cloud-native SaaS applications from scratch, leveraging **TypeScript, Next.js, and Node.js** to sustainably support over 4,000 monthly active users.
- **Distributed Team Leadership:** I managed a remote engineering team of 5 developers, hosting technical workshops and code reviews that increased team feature delivery speed by **20%**.
- **AI/ML CMS Integration:** I served as the Lead Engineer for the FusionHub AI CMS, building a smart, headless CMS using LangChain and OpenAI that automated **80%** of routine content workflows.
- **Agile Management:** I introduced structured Agile/Scrum methodologies and robust GitHub Actions CI/CD workflows, reducing product time-to-market by **40%** while minimizing regressions.

JOTAH ECOM NG LTD

Founder & Lead Engineer | *Owerri, Nigeria* | *Sep 2025 – Jan 2026 I engineered and commercialized Nigeria's premier multi-vendor e-commerce infrastructure, intentionally*

designed to securely connect premium buyers with verified, top-tier sellers.

- **Platform Turnaround:** I took full ownership of the technical recovery and optimization of a high-volume, fragmented marketplace engine.
- **Backend & Checkout Re-engineering:** Using **PHP (Laravel)** and **Node.js**, I refactored the backend checkout flow and escrow payment gateway integrations, which directly increased successful transaction rates by **18%** and allowed the core system to seamlessly manage 2x peak traffic loads.
- **Omnichannel Mobile Strategy:** I built and shipped high-performance consumer mobile applications using **Flutter (Dart)** and **React Native**, ensuring lightning-fast data synchronization with our central AWS database.
- **Personalization Pipelines:** I implemented secure identity federations utilizing X (Twitter) OAuth to responsibly fetch and map user social preferences, delivering a uniquely tailored retail feed for end consumers.

DOCCURE

Founder & Senior Backend Developer | *Remote* | *Jan 2024 – Dec 2024 I conceptualized and built this telemedicine SaaS platform to address systemic healthcare bottlenecks in Africa, directly eliminating long wait times and connecting patients with medical specialists.*

- **System Latency Optimization:** I led a comprehensive backend and database overhaul using **PHP (Laravel)** and PostgreSQL, successfully cutting data query latency by **50%** to guarantee real-time connectivity between doctors and patients during peak hours.
- **Cross-Platform Client Portals:** I engineered accessible mobile application modules using **React Native, Flutter, and native Java/Kotlin** to ensure any patient could securely schedule consultations regardless of their device constraints.
- **Secure Document Engineering:** I implemented compliant document workflows to handle sensitive medical data securely, building features for dynamic PDF health report generation and digital signatures on AWS.

SOKARLAB LTD

Software Architect | *Remote* | *2024 – Present I steer the technical architecture and framework design for localized B2B enterprise client applications.*

- **Framework Innovation:** I designed and developed a highly modular, reusable full-stack backend framework using **TypeScript and Node.js**, allowing internal engineering teams to launch new project lifecycles with **60% less boilerplate code**.
- **Architectural Diversity:** I successfully supervised and structured the core architectural definitions for over 10 diverse web and cross-platform mobile backends, ensuring unified security protocols across all deployments.

EDUCATION

- **B.Sc. in Software Engineering** | Brigham Young University (BYU) | Graduated: 2024
- **B.Sc. in Computer Science** | Imo State University (IMSU) | 2022 – Present

- **National Diploma (ND) in Computer Science** | Federal Polytechnic Nekede, Owerri | 2019 – 2021

CERTIFICATIONS & AWARDS

- **GDG Best Developer of the Year:** Awarded in 2024 for outstanding technical delivery and community impact.
- **Project Management Certification:** Professional Institute of Management (PIM) — Specialized in Agile, Scrum, and Resource Allocation.
- **AWS Cloud Practitioner Essentials:** Amazon Web Services.
- **JavaScript Algorithms & Data Structures:** freeCodeCamp.
- **React - The Complete Guide:** Udemy.
- **CISCO Certificate in Advanced JavaScript:** Issued in 2020.
